

Waiting List Management

Overview

We can help to:

- Support the rapid return to elective surgery
- Optimise pathways
- Use check-lists and available guidance
- Make the best use of capacity available across healthcare system
- Support opportunities to incorporate technology

Common Challenges

Elective procedures have been hugely impacted, in many cases stopped entirely, during the fight against Covid-19.

This support package aims to help the Health Service not only restart elective work as expeditiously as possible, but to do so in a way that helps reduce the backlog of patients that are now on waiting lists. This will be through the

provision of resources, best in class pathways, technology and using capacity in the most efficient way.

Our Services

Areas of support

Waiting list management; The rapid return to elective surgery, focused on clearing waiting lists negatively impacted by Covid-19.

How can we help you

JJML are able to provide a mini-managed service focused on the elective area of your choice, this service will ensure capacity, medical devices, optimised pathways, technology and a focus on enhanced recovery protocols (ERP), this could be a 12, 18 or 24 month programme

designed to significantly reduce waiting lists and provide you with a framework in place to use moving forward.

We understand that your circumstances will be unique and therefore we will focus our resources and support in a tailored way.

As guidance evolves we will use the appropriate tools and report through the governance system you put in place.
