TRUESPAN™ Meniscal Repair System

MENISCAL REPAIR SIMPLIFIED

Now Available In PLGA

DePuy Synthes
MITEK SPORTS MEDICINE
PART OF THE johnson & johnson FAMILY OF COMPANIES
**SIMPLIFIED DEPLOYMENT**
Device features an ergonomic design that is comfortable to hold and a single trigger, allowing use with only one hand. No needle assembly or reloading steps required.

**DESIGNED TO BE ROBUST**
Implants and suture are protected by a depth stop and rigid needle while accessing hard to reach locations.

**VERSATILE**
Available 0°, 12°, & 24° needles pre-loaded with non-absorbable PEEK and absorbable PLGA implants and partially absorbable 2-0 ORTHOCORD® Suture.

**LOW PROFILE**
Small size needle & implants minimize tissue disruption and ‘kickback’ during deployment. Repairs with TRUESPAN™ Implants do not leave a knot or hard body on articular surfaces.
