

# RIGIDLOOP™ Cortical Fixation System

## A Complete Family of Cortical Button Devices

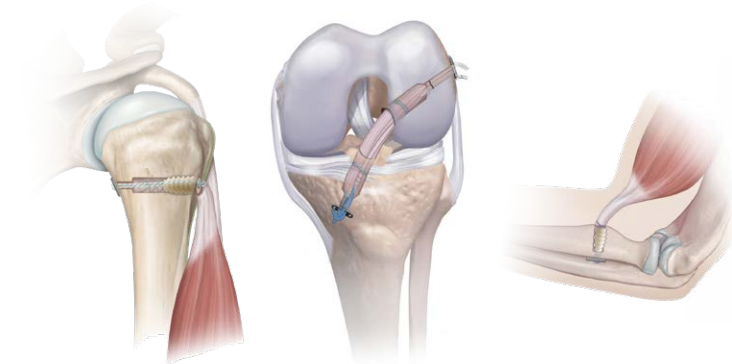

- Comprehensive product offering to address multiple sports medicine procedures
- Strong, dependable cortical fixation
- Accommodates various tunnel sizes

# The RIGIDLOOP™ Cortical System Family of Devices Delivers Full-Scale Reliability and Versatility

This versatile titanium button comes pre-loaded with a white leading suture and green flipping suture. It can be used for fixation of soft tissue to bone in shoulder, elbow and knee procedures.

The fixed loop button offers excellent fixation strength while minimizing graft laxity.<sup>1</sup> It comes in multiple loop sizes ranging from 15mm – 60mm. An oversized bailout button is also available.

The adjustable button delivers simplicity and performance with infinite loop tensioning. It has the lowest displacement vs. other tested adjustable cortical implants.<sup>2</sup>
