Anatomically precontoured low profile plates
- Reduce soft tissue problems
- No need for plate contouring

Angular stability
- Prevents screw loosening as well as primary and secondary loss of reduction
- Allows early functional mobilization
- As an internal fixator the plate preserves bone vascularization
- Offers improved purchase in osteoporotic bone

LCP combi-holes
- Combine a dynamic compression unit (DCU) hole with a locking screw hole
- Permit an internal plate fixation using standard screws, locking screws or a combination of the two

The LCP Distal Femoral Plate 4.5/5.0 (LCP DF) is now also available with 15, 17 and 19 holes with lengths from 356 mm up to 436 mm. These plates are available in sterile only.

- 034.000.315 LCP Distal Femur, right
- 034.000.320 LCP Distal Femur, left

Note: Plates with 5 to 13 holes are offered in lengths from 156 mm up to 316 mm. They are available in sterile and non-sterile. Add suffix “S” to the article number to order sterile product.

Anatomically precontoured low profile plates
- Reduce soft tissue problems
- No need for plate contouring

Note: Excessive and repetitive bending is not recommended as it may weaken the plate.
