Inter-lock Screwdriver.
T25/3.5 mm hex.

For use with all Synthes T25 and 3.5 mm hex recess screws

Screwdriver tip engages into the recess of the screw

7.5 mm shaft diameter
**Intended use**
The Inter-lock Screwdriver can be used with any Synthes bone screw that has a T25 or 3.5 mm hexagonal recess.

**Features**
- Screwdriver tip engages into the recess of the screw
- After unlocking the nut, no force is required to disengage the screw from the tip of the screwdriver
- 7.5 mm shaft diameter
- Available in 224 mm and 330 mm lengths

**Note:** When removing implants after long-term implantation, especially in the presence of large amounts of bony ingrowth, first use a solid screwdriver to loosen the screw. The Inter-lock Screwdriver can then be used to remove the screw from the surgical site.

If using the Inter-lock Screwdriver with locking screws, use a solid screwdriver for final tightening.

**StarDrive and Hex recess screws**

**Screwdriver tip**
Engages into screwhead recess

**Nut**
- Turn clockwise to engage
- Turn counterclockwise to disengage

**Two part construct:**
- **Slider**
  Hooks under nut to engage with shaft
- **Shaft**
  Engages into screw recess
Instructions for use
To engage the screwdriver tip in the screwhead recess:

1. Seat the screwdriver tip into the screwhead recess.
2. While applying axial pressure to the screw, turn the nut clockwise until the tip of the slider is fully engaged into the screwhead recess. Tighten nut.
3. Insert or remove screw.

To disengage the screw from the screwdriver, turn the nut counterclockwise until the slider is disengaged from the screwhead recess.

Note: Always engage the slider tip into the screwhead recess before use. Do not lever screwdriver when inserting screw.

Instructions for assembly
1. Slide the nut onto the shaft.
2. Hook the slider under the nut.
3. Place the slider down onto the shaft and slide the nut and slider back toward the handle.
4. Thread the nut counterclockwise onto the bottom of the screwdriver shaft.

Instructions for disassembly—cleaning
Disassemble the screwdriver into three parts for cleaning (nut, slider and body).
1. Turn nut clockwise until nut is disengaged from threads.
2. Unhook slider from nut and remove.
3. Slide nut off shaft.

Note: The Inter-Lock Screwdriver is only compatible with Synthes screws.

Note: For additional information, please refer to package insert.
